

MARKING RECLAIMED PISTONS

1. Upon occasion it will be found that the piston of a pumping unit returned to this company for reconditioning can be continued in service, but that the cylinder cannot be so continued because it is cracked or for some other reason.
2. Such salvaged pistons shall be identified by etching above the identifying serial the letter "S", signifying salvage, and the year in which salvaged.
3. The cylinder into which the piston is fitted shall be stamped with the complete symbol including the letter "S" and year of salvage that appears upon the piston.
